

Dear Hiring Team,

I am writing to express my interest in the Generative AI Engineer position at Zensar Technologies. I am a B.Tech Computer Science and Engineering graduate with hands-on experience in Generative AI, Large Language Models, Retrieval-Augmented Generation (RAG), Machine Learning, and Python-based AI systems.

During my AI/ML Engineering internship at AadiSwan Info Consultants, I worked on a Financial Document Intelligence system involving hybrid RAG pipelines using FAISS and BM25, query expansion, reranking, LLM integration, and retrieval evaluation. I also contributed to improving a RAG pipeline from V1 to V2 for financial and banking documents, working with Hugging Face models and fine-tuning-related workflows to improve domain-specific AI performance.

My project experience further includes building FinSight AI, a financial intelligence copilot with multi-document ingestion, hybrid retrieval, evidence-grounded answers, financial KPI extraction, and Azure OpenAI integration. I have also worked on agentic and multi-agent AI workflows using LangGraph, FastAPI-based AI services, OCR pipelines, prompt engineering, guardrails, and structured LLM outputs.

My technical skills include Python, Machine Learning, Deep Learning, Scikit-learn, PyTorch, TensorFlow, LangChain, LangGraph, Hugging Face, FAISS, BM25, FastAPI, REST APIs, Azure OpenAI, AWS, Docker, SQL, and MongoDB. I am particularly interested in building reliable, scalable, and production-oriented Generative AI solutions.

I would welcome the opportunity to contribute my hands-on GenAI, LLM, RAG, and AI engineering experience to Zensar while continuing to grow alongside experienced engineering teams.

Thank you for your time and consideration. I look forward to the opportunity to discuss my application.

**Sincerely,
Vivek Mane**
